

That's New Information

And now for our feature presentation:

THE LIBRARY...EVERYWHERE

The Health Sciences Library releases a video highlighting your information resources.

The Health Sciences Library is proud to introduce its first video presentation: **The Library...Everywhere!** It was previewed July 4 by the hospital's Executive Steering Group and advance reviews have been very positive. "In this age of lifelong learning I think it is very important for hospital staff to be aware of the products and services available from the library. This short video clearly communicates this message in a clever and engaging format." said Dr. Patricia Houston, Vice President, Education. The creation of this video, the first of a planned series, gave us a great opportunity to test out the principles of the Education portfolio by collaborating with a U of T Faculty of Information practicum student, Ms. Lydia Tsai.

In the first twenty four hours, the video had been viewed over 150 times.

The video will be available permanently at <http://youtu.be/JKOCyia154Y>. We hope you will enjoy watching it as much as we enjoyed creating it.

July 21 – 27, 2012 is National Drowning Prevention Week

Drowning deaths have continued to increase in recent years. In 2006, the most recent year that statistics are available, 508 Canadians died in water-related incidents. Summer is the time of the year when most water accidents occur.

Visit <http://www.lifesaving.ca> for more information.

Would you recognize if someone were drowning? Watch *Within Arms' Reach*, a video available at the Health Sciences Library, or visit: <http://tinyurl.com/7y8zgye>

A Fresh New Look for the Health Sciences Library Page

The library website has been redesigned to streamline access to our resources and services. Please check us out at our new location under quicklinks on the Intranet Home Page.

Our websites are a work in progress, and we welcome any comments, concerns or questions.
