Introducing Zack Osborne, Library Services Team Leader

The health sciences library is thrilled to have Zack Osborne join our team. Zack comes to us from the Ontario Colleges Library Service (OCLS), and has extensive experience in special and academic libraries. Here's a bit more about Zack:

What do you do for fun? I love to ride my bike around the city, go to the Island, and explore different neighbourhoods of Toronto. I also love to cook, and eat!

Why did you become a librarian? Because I love helping people find what they're looking for, and I'm nerdy about information technology and metadata.

What excites you about working at the SMH Health Sciences Library? I'm enthusiastic about enhancing the Health Sciences Library with the help of user feedback (suggestions from YOU), introducing new and emerging technologies, and providing you with resources (eBooks, databases, iPads, and whatever else) to support your research and clinical needs as SMH staff. Libraries are awesome, and they are for YOU!

What are your dream vacation destinations? Faroe Islands, Japan, New Zealand
